As per the discussion we had regarding the Hospital Management Software (Web Application for HMS) **on 14th Sep 2020** for your esteemed organization. Here we are pleased to send you the quotation for the same find the details mentioned below.

COMMERCIAL OFFER –PROJECT COST

Sl. No	Based on Modula	Product Name	Total Cost
1	15	Qura Sof (HMS)	Rs. 2,50,000
2		SMS (Additional Charges)	
Total			**Rs.2,50,000**

PAYMENT SCHEDULE:

Sl.No	Phase	Modals	Timeline	Cost
1	Phase 1	At the sign of agreement		Rs.83,333
2	Phase 2	Module 1 to 9	60 working days	Rs.83,333
3	Phase 3	Module 10 to 15	60 working days	Rs.83,333
Total				**Rs.249,999**

PROPOSED MODULES:

Sr.No	Module	
1	Login credential	(Multiple login credential, Admin login is secured with encrypt file).
2	OP Registration	Patient Registration, Generate Admission & membership card , Hospital visit, Get Token
3	IP Registration	Admitting patient, Treatment summary, discharge summary.
4	Operation Theater	Surgery Update
5	Investigation	Patient investigation report
7	Medical Certificate, Birth Certificate, death Certificate.	Can take the printout of certificate
8	Report manager	Inpatient , outpatient, different type of surgery, emergency , ICU,NICU, Department, Doctors , Category, Based on Batch, Statistic

9	Admin	Admin access all the User dashboard through the dashboard Admin can control all the user
10	Blood Bank	Registration, Reports
11	Staff	Registration, Reports
12	Internal Message	Internal message transaction
13	Role permission	Admin can allocate the permission to the user
14	Login Tracking	1.Admin can track the user when she/he is login &logout 2.If user editing or deleting the data can be track
15	SMS	While User create patient record confirmation message will go to Patient.

Qura Sof @ –Introduction

Qura Sof- A Comprehensive ERP solution for Hospital to meet the entire requirements of a camp. It is a completely integrated Hospital Management Software (HMS) designed and developed by Iroots Software Developers. **Bangalore**. Qura Sof is developed to achieve higher level of performance in handling all activities (Hospital & Administrative) of an institution.

Efficient management through disciplined action distinguishes the best Hospital from the good ones. It is the secret behind the success of all modern educational establishments. Many Hospitals across the India are happy that they started using '**Qura Sof**' to monitor all their Hospital activities.

Qura Sof enables Hospital to minimize the labor-intensive tasks, analyses the performance, Deferent type of Report, parameters, medical history and overall the Hospital functionality of a Hospital can be streamlined.

Qura Sof is Hospital of handling multi user, multi department, This extremely user- friendly software solves even the most complex task of campus administration. The package meets the unique requirement of each an every campus. **It means a customized solution will be provided to fulfill the need of each institution**.

Qura Sof performance, unparallel ease of use, flexibility, integration, comprehensiveness, optimized coding, and reliability makes it a powerful tool which hospital cannot do without. Our user-friendly software saves valuable time, frees the administrator, office staff to do what they do best.

Scope of work for the Development & Implementation

Proposed System :

The proposed system of providing integrated hospital management software is required to be a customized application software package based on server-client architecture. The entire system functionality of the

hospital campus will be managed by a database server system. Through restricted accessibility and availability of different modules the entire setup will be full proof in terms of security aspects. The system will procure all inputs from different departments and process it in the main database server and provide a feasible result to the end user.

- To study the existing manual/automated functionality of the Qura sof for the above task and finalize the framework for an automated ERP solution.

- To extend the support to different section users for development of formats, communications, logic, report generation etc. and prepare the final documentation of the propose application software.

- To provide suitable database backup and recovery procedures in case any system/database crash.

- The scope of the project also includes data security, communication between different departments/locations, integration of the entire academic and administrative spectrum on a single database server.

- Identify the extent of historical data/back log data required to be Qura to make the system functional.

- Development of the customized application software based on the above inputs from different departments.

- This project involves system study, preparation and acceptance of the design, development, customization, installation, training (department wise up to user level) and on-site support for 12 months from the date of first installation. The customized ERP software will be developed as per Rational Unified Process (RUP) standard for development and documentation.

Technology

This project will be a web application to be developed in C# 4.0 having SQL Server 2014 as backend.
- Database Design (Ms SQL Server)
- Form Design (.NET, MVC)
- Coding (C# ,J, Query)

Conditions

- IROOTS is liable to execute the Project Successfully.

- Company will start working with the project on the basis of written work order along with advance payment. However, if any mutual agreement has to be reached, company will extent full co-operation.

- Company will make a proper system study with the authorities. The entire modifications/customizations in the package has to be provided in written to the company within 45 days from the date of order confirmation.

- Any major customization & modification, after 90 days, required for the Hospital will be charged extra.

- Hospital will be responsible for arrangements of necessary Computer hardware & networking requirements. Advice will be given from company side.

- Training will be provided to the concerned staff along with installation. Operation manual will be provided for your ready reference. Any repeated training would be charged extra.

- Transportation cost: During the Development of full Project, transportation cost of IROOTS IT professionals to the client's office outside Indore would be billed separately to the client on actual.

- All cheques, DD and NEFT should be in the Name of IROOTS.

- Maintenance Yearly Rs.20 %.

- Maintenance will be Excluding SMS,

- Every 3years once 5% Maintenance will increase.

- No service or support will be provided, if AMC is not renewed.

- Iroots will be a responsible for the Data security; will not allow any danger of security breach.

Monitoring and Evaluation:

The entire software (development & maintenance) has to be monitored both by Iroots Software Company and the evaluation of the software has to be carried out twice in a year. This can be done at 360 degree level for the benefits of the School and the product. We assure you that this particular software will be of good standards and will make your organizational more professional and will be customer friendly.

With Warm Regards,

(Marketing executive)
